Cooperativeness	<div><div></div></div>	90%
Project Management	<div><div></div></div>	81%
Debugging and Testing	<div><div></div></div>	75%
Object Oriented Design	<div><div></div></div>	86%

OBJECTIVE

Being a student of Computer Science, I was able to learn a lot from my studies all throughout my education. My experiences aside from academics also helped me become a good team player and improving my communication skills, having worked in different fields over my life. Moreover the extensive work I have done both in terms of programming and otherwise has taught me a lot of things, including good worth etiquette and professionalism. I look forward to the improvement of my skills in a professional field which will surely be helpful in the future, and to enhancing my skills and learning to apply them in my career as a software developer.
